

# RSVP *Rapid Connect*

## Achieve real efficiency using technology

### Control Publication and Sales From Your Case Management System

*Rapid Connect* joins your case management system to Paratis, RSVP's order placement and management platform, enabling you to place legal notice advertisements with more than 2,500 publications in 26 states and the District of Columbia, and foreclosure sales in eight Western states.

Our team of product, technology and operations specialists will work with you to integrate *Rapid Connect*, raising convenience and productivity to a new level.

#### **Automate order placement and tracking**

Using *Rapid Connect*, posting, publication and auction orders are conveniently made and verified from your case management system. There is no need to Fax or e-mail orders or to follow up with phone calls; it's now core to your workflow.

Save time, improve accuracy and reduce communications costs.

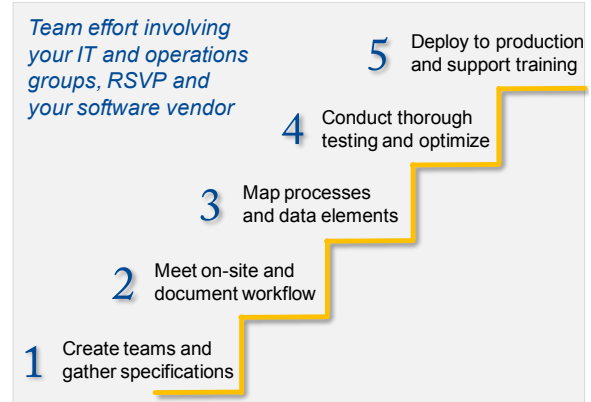

#### **Your case files are updated automatically**

Every order you submit through *Rapid Connect* is uniquely identified using your case or file number and you receive an automatic order confirmation. As your order is fulfilled, milestone dates and fee schedules are uploaded directly to your case files, providing real-time order status and eliminating the need for manual updates.

Bid farewell to time-consuming ordering processes and phone calls, as *Rapid Connect* automates manual tasks.

#### **Robust Technology and Reliability**

RSVP's technology infrastructure features processing capacity that is, practically speaking, limitless. It features a continuous power supply to all technology components and independent paths to the Internet backbone, assuring ongoing operability.

*We support your implementation with a detailed plan and a technical and project support team.*

### Making it Work for You

When you're ready to integrate your case management or production platform using *Rapid Connect*, we will provide you product and technical support and a plan to complete the integration within a prescribed schedule.

We have a five-step process that begins with a detailed documentation of your workflow. It includes on-site visits to ensure all details have been addressed and is complete only when your operations team has signed off on performance and functionality.

The pay-off is instantaneous: you'll process orders faster and with greater efficiency. You will focus less on the details of publication and agent management, and more on your practice and your clients.

### Get Started

Upgrading to *Rapid Connect* can help you reduce administrative overhead and concentrate your posting, publication and agent management tasks to a single electronic interface.

Call us now for more details, and ask for a copy of our report, "Connecting with RSVP." It explains how we make "simple" happen.
